All classes will be offered Virtually and In-Center at our Willow Run Education Facility (minimum to run an In-Center Class is 3 students signed-up). The chart shows multiple class versions offered the same dates, the actual Creo version to be taught will depend on the students signing-up for class for whichever version they need. Some classes versions can be combined, some can not. If we have a scheduling conflict for a specific class we will let everyone know in plenty of time to accommodate customers schedules/requests. GMIC, LLC also offers on-site classes to fit our customer's needs.
